| *Fither HAST or HT3DB are tes | >95% lead coverage required                        | ]           |           |         |

<sup>\*</sup>Either HAST or HT3RB are tested for a set of devices.

## Calculation of FIT and MTBF

Test considered for FIT calculation: High Temperature Reverse Bias (HTRB) and High temperature Gate Bias (HTGB). Confidence level 60%, derated to 55°C, activation energy 0.7Ev test time 168 to 1000 hours.

| Technology | Quantity | Failure rate | MTBF    |
|------------|----------|--------------|---------|
| T2         | 462      | 2.6          | 3.83E+8 |
